

Safety Tip Sheet

Guidelines for Eye Protection During the COVID-19 Era

TIDI eye shield
PMM² # 76908

Standard-Issue equipment with extensions for the sides of the eyes is consistent with CDC¹ recommendations for safety glasses for routine patient care in the COVID – 19 era.

Chemical Safety Goggles

Face shield

If individuals or departments want to purchase eye protection that is different from what is now being provided by Material Services, please use the following guidelines and product suggestions found [here](#):

Guidelines for voluntary use of eye shields NOT issued by the employer:

- All surfaces and components of the eye shield must be able to be cleaned and disinfected routinely.
- Eye protection must have side shields or is able to wrap around and provide coverage on the sides of your eyes, see photo samples on this page.
- A face shield is worn over the eye shield at all times when there is a risk of splash and/or sprays.
- Prescription lens inserts can be used with eye shields that meet the above criteria.
- Discard if damaged, if visibility is obscured, and reprocessing does not restore visibility.

*Can be used as OTG
'over the glasses'*
PMM² # 588519

Wrap-around glasses
PMM² # 138866

Sample trauma glasses

Side-shield for Rx glasses
NOT RECOMMENDED
