

## Security Workflow Mission Bay for Suspect Ebola Patients

Communicate with supervisor that additional staff members are needed to: 1. cover your post 2. help secure path of travel from all other persons not involved with the care of the patient including both staff/visitors

Maintain a distance of greater than 6 feet from the patient at all times

Retrieve doorstop from Triage binder

When patient is ready to move from one area to another:

No additional PPE is required; wear the universal mask that is required while in healthcare settings. Ensure you do not touch the patient and that the patient does not touch any surfaces

Ensure path of travel is clear of any other people; coordinate with additional security staff to redirect patients, visitors, staff to alternate pathways

Walk ahead of the patient and accompanying staff (group), open all doors using doorstop if needed to maintain a distance of greater than 6 feet

After everyone is through the door, have the group wait and resume your position in front of the group  
See map and details below:

1. Open door with badge; use door stop to prop door then step back to a distance greater than 6 feet
2. Patient enters room 3 or 4 through hallway entrance; close door behind patient
