Travelling COVID-19 Risk Screening

UCSF strongly recommends that you not travel. If you have traveled beyond the 9-county SF Bay Area* and need to work onsite within 14 days of your return, UCSF (including Oakland) now requires that you attest to the following conditions in order to work on-site:

- I will get a COVID test ideally 2 days prior to first day of work, or else on the first day of work.
- If my return to work on-site occurs less than 7 days after return from travel, I will get a 2nd COVID test 5-7 days after the first test.
- Except for work, I will quarantine at home for 10 days following return from travel.

You can continue to work today.

Please visit the UCSF Travel website link to learn how to get COVID testing now. See screener for handout with link.

*9-county SF Bay Area includes Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Santa Cruz, Solano, and Sonoma counties.
Possible COVID-19 Exposure

UCSF is testing any employee/faculty/student who is concerned about possible exposure to COVID-19 in their home, community or work place during the past 7 days. Would you like to have a test today? (You can still work while waiting for test result.)

You can continue to work today.

Please visit the UCSF Exposure website link to learn how to get COVID testing now. See screener for handout with link.
Travel COVID-19 Risk Screening

Please visit this website when you get to your work area to determine if you should get tested for COVID-19: http://tiny.ucsf.edu/covidTest
