# Symptom/Exposure Review

1. In the past 24 hours, have you had one or more of these symptoms, which is new or not explained by a pre-existing condition?
   - Fever, chills, or shivering/shakes (≥ 37.8°C / 100°F)
   - Cough
   - Sore throat
   - Runny or congested nose (not related to allergies)
   - Difficulty breathing or shortness of breath
   - Unexplained muscle aches
   - Feeling unusually weak or fatigued
   - Loss of sense of smell or taste
   - Diarrhea (defined as ≥ 3 stools in 24 hrs)
   - Eye redness +/- discharge ("pink eye," not related to allergies)

# Can I Work Today?

**Additional actions**

- Consult with your medical provider as needed or if symptom worsens
- Call COVID Hotline (415.514.7328) for testing and evaluation

# When Can I Return to Work?

**Complete Symptom Resolution** required for staff working on High Risk Units.

**If COVID-negative:**

- Must be fever-free for 24 hours without the use of a fever-reducing medication.
- For symptoms other than fever, you may return-to-work if:
  - Symptoms are resolved or lingering symptoms are improving
  - You wear a mask at all times and you not working in High-Risk Units or Areas.
- Diarrhea-free for 48 hrs (when not part of a pre-existing condition)
- YOU’RE ABLE TO CLEAR VIA THE DAILY HEALTH SCREENER. YOUR PASS ACTS AS THE OHS CLEARANCE EMAIL.

**If COVID-positive:** follow guidance in #9

**If COVID-untested:**

- Check with COVID Hotline (415.514.7328)
- 10-day quarantine since symptom onset is an acceptable alternative to COVID-19 testing. If immunocompromised, then 20-day quarantine required.

*For Isolated Runny Nose at Benioff Children’s Hospital, if you work on a High Risk Unit, a respiratory virus panel will be performed.

- If COVID-negative but positive for any other respiratory viruses: Do not return to High Risk Unit for work until symptoms are resolved at ≥ 3 days since Runny Nose onset
- If COVID-negative and negative for all other respiratory viruses: Return to work after ≥3 days since Runny Nose onset with symptom monitoring; if ANY symptoms arise, notify manager, go/stay home and call COVID hotline (415.514.7328) for further review
### Symptom/Exposure Review

2. In the past 14 days, have you had one or more of these symptoms, which is new or not explained by a pre-existing condition?
- Fever, chills, or shivering/shakes (≥ 37.8°C / 100°F)
- Cough
- Sore throat
- Runny or congested nose (not related to allergies)
- Difficulty breathing or shortness of breath
- Unexplained muscle aches
- Feeling unusually weak or fatigued
- Loss of sense of smell or taste
- Diarrhea (defined as ≥ 3 stools in 24 hrs)
- Eye redness +/- discharge ("pink eye," not related to allergies)

<tr>
<td>Possibly, see below for details.</td>
<td><strong>No</strong>, if you are fully-vaccinated(^9) or essential health care worker(^8), you can work.</td>
<td>• If you are fully-vaccinated(^9) you do not need to quarantine, but you should monitor symptoms for 14 days after return, and you should obtain a COVID-19 test through Color, 3-5 days after returning from travel. If you have immunocompromised medical conditions, consult with your doctor about the timing for return to work.</td>
</tr>
</tbody>
</table>
| **Before Returning to the U.S.**  
The Centers for Disease Control and Prevention (CDC) requires all air passengers entering the United States (including U.S. citizens and legal permanent residents) to present one of the following:  
1. A negative COVID-19 test taken 72 hours or less before boarding a flight to the U.S.; or  
2. Proof of COVID-19 infection within the last 90 days. | **YES**, if you are not fully-vaccinated\(^9\), stay at home until you have obtained OHS clearance to return to work. | • If you are not fully-vaccinated\(^9\): OHS CLEARANCE EMAIL IS REQUIRED BEFORE RETURNING TO WORK. General principles listed below. |
| For On-Site Workers\(^8\) at any UCSF locations: | • Outside of work, follow post-travel (home) quarantine guidance. | • If you returned from travel and develop symptoms of COVID-19 (listed in #1 above), call COVID Hotline (415.514.7328) for testing and further evaluation |
| **A. Fully-Vaccinated\(^9\):** you do not need to quarantine, and you should obtain a COVID-19 test through Color 3-5 days after returning from travel. Monitor symptoms for 14 days after return. | • Call COVID Hotline (415.514.7328) for return to work clearance. | • **Self-monitor\(^5\) for symptoms for total of 14 days** |
| **B. Essential Health Care Worker (Approved by UCSF) & Not Fully-Vaccinated\(^9\), OHS CLEARANCE EMAIL IS REQUIRED BEFORE RETURNING TO WORK.** | • Self-monitor\(^5\) for 14 days, beginning on the first day back in the US. | • **Home Isolation instructions\(^6\)** |
| • Test 3-5 days after travel. May return to work immediately, but must home quarantine for 7 days when not at UCSF. Monitor symptoms for 14 days after return. (Cont pg. 4) | • Home Isolation instructions\(^6\) | • **Consult with your medical provider as needed or if symptom worsens** |

immediately, but must home quarantine for 7 days when not at UCSF. Monitor symptoms for 14 days after return.

B. **Workers not required to be on-site immediately after returning & Not Fully-Vaccinated**: You may choose either option below.

- **Option 1**: Test 3-5 days after travel and home quarantine 7 days if test negative. No entry to UCSF for 7 days. Monitor symptoms for 14 days after return.

- **Option 2**: Without test, no entry to UCSF for 10 days and home quarantine 10 days. Monitor symptoms for 14 days after return.
### Symptom/Exposure Review

#### Can I Work Today?

YES, if you do not have any symptoms listed in #1, you may continue to work if you adhere to the following instructions:

- Complete this one-time web-based survey for each non-UCSF work environment (use Chrome or Firefox): [https://ucsf.co1.qualtrics.com/jfe/form/SV_862Clam03I9ENHD](https://ucsf.co1.qualtrics.com/jfe/form/SV_862Clam03I9ENHD)
- Self-monitor for symptoms twice a day, including temperature, by using the symptom monitoring form
- Consult with manager about assigned duties/patient assignment
- Practice meticulous hand hygiene
- If any symptoms listed in #1 arise, immediately cease patient care activities, notify supervisor, go home, and call COVID Hotline (415.514.7328) for further review
- Guidance about home isolation and testing will be provided by OHS case managers after reviewing your survey responses as it relates to your levels of PPE and COVID exposure. Direct questions to COVID Hotline (415.514.7328).

#### Do I Need to Stay at Home?

- YES, stay at home if you have symptoms in #1
- Call COVID Hotline (415.514.7328) for testing and evaluation
- Self-monitor for 14 days, or longer if you develop symptoms
- Home Isolation instructions
- Consult with your medical provider as needed or if symptom worsens
- Call COVID Hotline (415.514.7328) for return to work clearance

#### When Can I Return to Work?

If you returned and had symptoms in #1
- Call COVID Hotline (415.514.7328) for testing and evaluation
- Self-monitor for 14 days, or longer if you develop symptoms
- Home Isolation instructions
- Consult with your medical provider as needed or if symptom worsens
- Call COVID Hotline (415.514.7328) for return to work clearance

---

**Definition:** UCSF Health facilities include 1) Parnassus, Mission Bay/BCH-SF, BCHO, Mt. Zion inpatient hospitals, and 2) all UCSF Health Ambulatory sites (clinics and diagnostic/treatment departments).

At the present time, SF VA Medical Center (VAMC) and Zuckerburg SF General (ZSFG) are also considered equivalent to UCSF Health facilities.
### Symptom/Exposure Review

1. In the past 14 days, have you had unprotected, prolonged close contact\(^1\) with someone with confirmed/diagnosed COVID-19?

   Unprotected\(^4\) includes:
   - HCP not wearing a respirator or facemask
   - HCP with mask but not wearing eye protection, if the person with COVID-19 was not wearing a cloth face covering or facemask
   - HCP not wearing all recommended PPE while performing aerosol-generating procedure for any time period of exposure

   Prolonged, close contact defined as within 6 feet for 15 mins or longer.

### Can I Work Today?

- NO ENTRY, UNLESS YOU HAVE AN OHS CLEARANCE EMAIL

### Do I Need to Stay at Home?

- YES, stay at home
  - If your exposure happened at home, at work, or in the community, regardless of symptoms, call COVID Hotline (415.514.7328) for assessment and further instructions.
  - Self-monitor\(^5\) for at least 14 days since exposure
  - Home Isolation instructions\(^6\)

### When Can I Return to Work?

- OHS CLEARANCE EMAIL IS REQUIRED BEFORE RETURNING TO WORK.

**Medium Risk Exposure: Conditions for Returning to Work if not fully-vaccinated or have immunocompromised condition. You are eligible to return to work immediately following OHS Hotline interview if you are asymptomatic and agree to testing protocol.**

- Call COVID Hotline (415.514.7328) for assessment and instructions
- COVID Testing Day 3 (allowed PCR test outside of UCSF) and Day 7-9 after last exposure
- Continue home quarantine (except travel to / from work) & symptom monitoring for 14-days.

**Medium Risk Exposure: Conditions for Returning to Work if fully-vaccinated and do not have immunocompromised condition. You are eligible to return to work immediately following OHS Hotline interview if you are asymptomatic and agree to testing protocol.**

- Call COVID Hotline (415.514.7328) for assessment and instructions
- COVID Testing Day 3 (allowed PCR test outside of UCSF) and Day 7-9 after last exposure
- Continue symptom monitoring for 14-days.
- If meeting fully-vaccinated criteria and no immunocompromised condition, then home quarantine not required.

**High Risk Exposures: Conditions for Returning to Work if not fully-vaccinated or have immunocompromised condition. You are not eligible to return to work immediately unless critical staffing conditions exist (with SVP approval):**

- If you live in the same household as a COVID positive contact, last day of exposure and clearance must be completed with OHS staff. (Cont. on pg. 9)
| If returning to work immediately under critical staffing, then COVID Test on Day 3 (allowed PCR test outside of UCSF) following initial exposure is required |
| COVID Test on Day 7-9 after initial exposure |
| Return to work after 10 days from last day of exposure |
| Continue home quarantine days 11-14 (except travel to/from work) & symptom monitoring for full 14-days |

**High Risk Exposures: Conditions for Returning to Work if fully-vaccinated and no immunocompromised condition.**
You are eligible to return to work immediately following OHS Hotline interview:
- Interview with COVID Hotline to confirm documentation of vaccination status and medical history.
- If you live in the same household as a COVID positive contact, last day of exposure and clearance must be completed with OHS staff.
- COVID Tests on Day 3 (allowed PCR test outside of UCSF) and 7-9 (Must be done at UCSF) after initial exposure
- If continuous COVID exposure (e.g. household contact) then additional testing might be necessary; OHS will determine.
- No more testing 10 days after last day of exposure
- Continue symptom monitoring for full 14-days after last day of exposure (Cont to Pg. 8)
- If you develop symptoms, immediately cease patient care activities, notify supervisor, go home, and call COVID Hotline (415.514.7328) for further review

**Exposure to Vaccine Breakthroughs in Household:**
- Exposure to COVID-19 vaccine-breakthrough infection in household where it’s not possible to isolate
  - Work quarantine required. Return to work after 10 days with 2 negative tests (day 3-5 and 7-9 after initial exposure) if asymptomatic

| 9. Have you been diagnosed with COVID-19 infection in the past 20 days? | **NO**, you may not return to work until you have received an OHS clearance email. | YES, stay at home and inform your manager that you will not be going to work:  
- Call COVID Hotline (415-514-7328) to report your COVID positive illness and receive follow up instructions.  
- If the COVID-confirmed exposure occurred in your household or at work, please call:  
  o UCSF Employees: Call OHS COVID Hotline (415.514.7328) to report your COVID-positive illness and receive follow-up instructions.  
  o Students call SHCS at 415-476-8736  
  o BCH Oakland Enterprise Health at 510-428-3620  
  • Self-monitor  
  • Home Isolation instructions  
  • Limit travel outside of the home  
  • Consult with your medical provider as needed or if symptom worsens  
  • Call COVID Hotline (415.514.7328) for return to work clearance | OHS CLEARANCE EMAIL IS REQUIRED BEFORE RETURNING TO WORK.  
Except for rare situations, repeat COVID-19 testing prior to Return to Work is NOT recommended by CDC & SFDPH.  

1. **Asymptomatic or Mild-Moderate Illness**  
- Return to work after **10 days** since positive test (if asymptomatic) or since first day of symptoms, if the following criteria are met:  
  o At least 24 hours have passed since last fever without the use of fever-reducing medications (e.g., acetaminophen, ibuprofen, aspirin); AND 48 hours have passed since last episode of diarrhea, AND  
  o Symptoms are improving, AND  
  o No concurrent immunocompromising conditions (see #3 below)  

2. **Severe or Critical Illness**  
- Return to work after **20 days** since first day of symptoms, if the following criteria are met:  
  o At least 24 hours have passed since last fever without the use of fever-reducing medications (e.g., acetaminophen, ibuprofen, aspirin); AND 48 hours have passed since last episode of diarrhea, AND  
  o Symptoms are improving  

3. **Immunocompromising Conditions**  
- Return to work clearance provided after 20 days since symptom onset, or as indicated by your primary health provider. Examples of immunocompromising conditions are listed below.  
  • If you have an immunocompromising condition or are being treated with biologics, please obtain written confirmation from a medical provider and be prepared to share that with OHS.
1. Staff includes all employees, faculty, temporary workers, trainees, volunteers, students, and staff who provide services to or work in UCSF patient care or clinical areas.
2. UCSF High Risk Units or Areas
   1. Mission Bay: C3 ICN, C6 BMT, C6 Heme/Onc, and the Birth Center
   2. Parnassus: Units 11L and 12L
   • Employees/Providers with symptoms or high risk exposures cannot work in designated High Risk Areas.
   • Employees/Providers with duties across units/areas should arrange patient assignment/duties with their supervisor/attending physician to minimize direct contact with high risk populations.
   • **High Risk Populations:** defined as immunocompromised patients (Solid organ transplant (SOT), SOT listed, SOT evaluation in process, primary immunodeficiency, and receiving immunosuppressants including chronic high-dose steroids, chemotherapy, biologics)
4. **Improper Personal Protective Equipment (PPE):** Final determination of whether PPE was appropriate for exposure is made by OHS and Hospital Epidemiology and Infection Control. With respect to PPE for procedures, appropriate PPE for non-aerosol generating procedures (AGP) includes a surgical mask, eye shield/protection, gown and gloves. If AGP, then appropriate PPE additionally requires N95 (not surgical mask) or PAPR. For more information about the transition to including surgical masks as PPE, visit [this UCSF webpage](#). Exposure categories:

</tr>
</tbody>
</table>

*For household contacts of persons with COVID, total days in quarantine and return to work will vary depending on degree of separation and isolation from household case.
[5] **Coronavirus Symptom Self-Monitoring:**
- Manual monitoring form can be found here on [UCSF Occupational Health website](https://www.ucsfmedcenter.org/).  

[7a] **Mild Illness:** Individuals who have any of the various signs and symptoms of COVID 19 (e.g., fever, cough, sore throat, malaise, headache, muscle pain) without shortness of breath, dyspnea, or abnormal chest imaging.  

Moderate: Individuals who have evidence of lower respiratory disease by clinical assessment or imaging and a saturation of oxygen (SpO2) ≥94% on room air at sea level.  

[7b] **Severe Illness:** Anyone requiring hospitalization or supplemental O2.  **Critical Illness:** Individuals who have respiratory failure, septic shock, and/or multiple organ dysfunction.  

[7c] **Immunocompromising conditions** may include (adapted from CDC guidance):
   1. Receiving current chemotherapy for malignancy  
   2. Having a hematologic malignancy that may be suppressing the immune system  
   3. Untreated HIV infection and CD4 T lymphocyte count < 200  
   4. Primary severe immunodeficiency disorder  
   5. Solid organ or hematopoietic stem cell (bone marrow) transplant recipient  
   6. Receipt of prednisone 20 mg/day or the equivalent for more than 14 days, or treatment with other high-risk immunosuppressive medications  
   7. The determination of whether persons with these conditions should return to work at 10 vs. 20 days should be made by the person’s health care provider.  

[8] **Essential Health Care Workers: Adapted from** CDC website: [https://www.cdc.gov/infectioncontrol/guidelines/healthcare-personnel/appendix/terminology.html](https://www.cdc.gov/infectioncontrol/guidelines/healthcare-personnel/appendix/terminology.html)  

**Essential Health Care Workers** include all persons serving in healthcare settings whose function supports care delivery to patients. These may include, but are not limited to, emergency medical service personnel, nurses, nursing assistants, physicians, technicians, therapists, phlebotomists, pharmacists, GME, and contractual and clinical administrative staff, billing) not directly involved in patient care but potentially exposed to infectious agents that can be transmitted among health care workers and patients.  

[9] **Fully-vaccinated individuals** defined as > 2 weeks since 2nd dose in 2-dose series (or 1st dose if single dose vaccine). Individuals who received a vaccine which does not have an FDA EUA, those who received a clinical (research) trial vaccine, or individuals with high risk exposures who are **immunocompromised**, will require an interview by the Occupational Health COVID Response team to discuss immunity.
